MASTROGIOVANNI, LUCA (LM)  
PROSPERINI, GIANLUCA (GP)  
SUBIRANA, ISAAC (IS)  
TORRE, MARINA (MT)  
VILA, JOAN (JV)  
FERRER, YOLANDA (YF)

---

**1) Welcome**

A Corona welcomes the attendees to the meeting.

**2) Overview of EURHOBOP-EUROTRACS posted and pending documents in the respective websites. (Marina)**

M Torre/A Corona will open a new page in EURHOBOP for publications.

The main paper is ready and we will distribute it soon.

The first option will be European Journal of Epidemiology.

As soon as we have the paper published we will be able to contact Susanne Løgstrup (Director, European Heart Network).

There is a paper of A Azevedo that we have to upload in the website. All the papers, not only those of the whole consortium have to be uploaded.

### **3) Dissemination of EUROTRACS. Next steps and preparation of the Athens Meeting (All)**

Our EUROTRACS officer has changed. Now it is Dr. Anne-Marie Yazbeck. The dissemination plan is still pending. It is not a deliverable but it is a milestone. We can talk about this in Athens. M Torre will involve Pascal Garel from HOPE .

### **4) Predictive functions in the member area (Isaac, Joan and Alessandro)**

J Vila shows how the Cassandra functions works.

We will prepare a similar introduction and the disclaimer. As soon as we have it we will send it to CINECA.

There will be 3 pictures. We will put a button to download better quality images and another for cvs information.

We will show it in Athens.

G Prosperini shows what is already in the EUROTRACS website. If we want to download the PDF we will put a link to the REGICOR website registration.

### **5) Future necessities in the web (All)**

All the minutes will be downloaded in PDF. The reports cannot be public.

M Torre will check if deliverables can be public.

We may think of improving the output of WP4 functions with a table of countries and costs per intervention when WP5 is completed.

M Torre suggests to include Max Brosa as a technological partner in the IMIM-PSMAR group, and we will ask him a presentation and a link to OBLIKUE.

M Torre will add a "some updated information" tab in the website after the Athens meeting.
