

Webex Teleconference of the EUROTRACS project November 13, 2014

Minutes

Participants:

IMIM-PSMAR:

ELOSUA, ROBERTO
FERRER, YOLANDA
MARRUGAT, JAUME
ROMAN, IRENE
SUBIRANA, ISAAC
VILA, JOAN

FMUP:

AZEVEDO, ANA

HMGU:

KIRCHBERGER, INGE

ESREFO:

SPAGNOLO, BARBARA
MARICA SABARESE

AEPMCV:

FERRIÈRES, JEAN

ISS:

TORRE, MARINA

HOPE:

NOTARANGELO, ISABELLA

CINECA:

CORONA, ALESSANDRO

DEASL:

SCIATELLA, PAOLO

OBLIKUE:

BROSA, MAX

Apologies for absence:

HCC-UOA:

FARMAKIS, DIMITRIOS

1) Approval of the Minutes of the teleconference of October 7th 2014.

The minutes are approved.

2) Second CHAFEA EUROTRACS payment received

The Coordinator institution has already received the EUROTRACS second payment from the European Commission. Today all partners have sent their bank data confirmation so transfers will be made during next week.

Co-funded by
the Health Programme
of the European Union

Consumers, Health and Food Executive Agency

- 3) The CAD incidence functions to be placed at member area of www.EUROTRACS-project.eu to be coordinated during an on-site visit.**
J Vila shows the EUROTRACS website where we will soon be able to use the functions, and introduce data in three different scenarios, and obtain the corresponding figures with the results for these scenarios, and also the tables or the excel files.
For the moment one can only access through a hidden link. In a few days it will be published in the member area. **If anybody needs to access these functions now, Alessandro will send him/her the way to proceed.**
- 4) Laymen summary of D3 & D4 suggested by our CHAFEA Officer prepared by Marina Torre**
The officer asked to have a laymen version of D3 and D4 for the website, and to give some description of the tables and figures.
In the dissemination area of the website we can open a section for technical reports and publish these laymen versions there.
- 5) Minor corrections on D3 to be sent to our officer**
In the process of preparing the above mentioned versions of D3 and D4 we made some corrections in Deliverable 3 which was sent to the officer.
- 6) Spanish Population Projections received in IMIM-PSMAR from Spanish Statistics Center. Data to be updated in the Spanish predictive function. Change to be informed in the final report.**
We received the Spanish projections expected by the end of 2014 and we need now to update these data on the Spanish predictive functions. J Vila, I Subirana and A Corona will take care of it.
- 7) Meeting of project coordinator with Prof Aldo Maggioni, ESC-EORP Scientific Coordinator, to be planned.**
We need an agreement of the ESC to use their ACS registry. This type of agreement requires a face-to-face meeting. **We are planning a preliminary teleconference. This is a strategic priority now for the project.**
- 8) Database received from Greece and added to WP6: D4 updated and submitted to officer.**
We received the ACS patient data from Greece. The data were added to D4 and this updated deliverable was sent to the officer again.
- 9) Data collection on costs forms ready on the web site ("Forms" section).**
We have been already posted the forms in the website. **The deadline for data collection is end of November.** During next month Max Brosa will calibrate and use this information with the model, and will prepare the report for January 2015.

10) Forthcoming deliverables

D6 Cost-effectiveness analysis of population interventions, is due in January 2015 (Max Brosa)

D10 Dissemination plan, is due in February 2015 (Marina Torre)

M Torre needs:

- the list of publications (JMarrugat)

- a 10 line description on the locally plan dissemination by partner.

11) EUROTRACS Final Workshop

Barcelona, 7th and 8th May 2015

12) Other issues:

The International Journal of Cardiology has almost accepted the EURHOBOP paper. We have to reply the comments made and submit the new version before December the 3rd.

We will distribute the new version among the EURHOBOP partners.

It would be very useful if we could have a URL to the functions as soon as the paper is accepted. A meeting with CINECA is planned for next week to prepare it.

Jean Ferrières suggests to describe the EUROTRACS-EURHOBOP databases as an instrument of collaboration with the ESC registries.

List of EUROTRACS publications so far:

- 1 PSMAR-J Marrugat / Projections of CAD incidence in participant countries.
- 2 PSMAR- I Roman / Differences in prognosis and management of elderly ACS patients in Europe.
- 3 DEASL- F Mataloni / Time to PCI. In-hospital mortality.
- 4 OBLIKUE- M Brosa / Cost Analysis of changing CHD 10 year incidence y population risk factor reduction.
- 5 OBLIKUE – Max Brosa / Cost analysis of optimizing management of elderly patients during ACS acute phase.

13) EUROTRACS next webex:

December 17th, 2014 at 14:30
